

## Business Blooming?

### Don't let the grass grow under your feet

Watch your business bloom with Polyart's unique and colourful horticultural tags and labels.

Polyart is a matt coated high density polyethylene available in a wide range of substances to suit a wide variety of horticultural applications.

Built to withstand even the harshest conditions, with Polyart's attractive tags and labels you can keep tabs on your plants, shrubs, trees and flowers.

Strong, durable and resistant to tearing, humidity and most chemicals, this synthetic paper is the perfect solution for self-labels, tie-on tags, fan folded tags, self-adhesive labels – the list goes on and on.

### Turn over a new leaf

With Polyart, printed colors remain bright and vibrant for added value and maximum impact.

Polyart has excellent opacity allowing for double-sided printing and sharp definition for crisp readable labels, and is compatible with water-based, solvent and UV inks.

With the look and feel of paper, Polyart provides:

- UV resistance
- Dimensional stability
- Thermal transfer printing with a large range of TT wax, wax/resin and resin ribbons
- Die cutting for even difficult shapes

Polyart is non-toxic, contains no chlorine or plasticisers and is fully recyclable.
